

Teaching and Research in Natural Sciences for Development in Africa

Donate your unused equipment to an African University

Make an impact, help other researches, furnish their labs with your unused equipment. You can make it happen, help others, help worldwide science.

Why it is important

Many researchers in Africa have ideas that could lead to life-changing discoveries. Many of these researchers attend to top-level international courses and lab exchanges in the USA or Europe and come back with knowledge on how to make them happen. However, they often face the hard reality that their home institution lacks the facilities required to carry out the necessary experiments. We aim at helping them by establishing top-level research facilities across the continent.

Why it is unique

Unlike other donation programs our donations always come with how-to knowledge, and we keep track that the equipment donated is being put to good use.

Teaching and Research in Natural Sciences for Development in Africa

Come teach to an African University

Dreaming of Africa? Fancy an academic experience in an interesting new environment? Volunteer at an African University as part of their academic staff!

Some of our Partners Universities

- Kampala International University, Uganda
- University of Addis Ababa, Ethiopia
- Mekelle University, Ethiopia
- Gombe State University, Nigeria
- Ahmadu Bello University (ABU), Nigeria
- University of Maiduguri, Nigeria
